

# HOW TO TURN OFF A ROTARY JET

## Step 1: Identify Your Spa Model

Locate the serial number label on the right side of the base pan (See Figure 1). The serial number label will either show a letter **D** or **E**. The three numbers following the letter indicates the spa production quarter (See Figure 2). If your three numbers are listed in table shown on Image 3 proceed to the next step.

Figure 1

MODEL DESIGNATOR

Figure 2

SPA PRODUCTION QUARTER

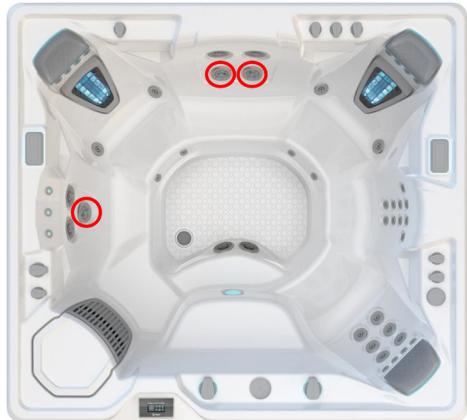

Year	Production Quarter			
2022				(D or E)422
2023	(D or E)123	(D or E)223	(D or E)323	(D or E)423
2024	(D or E)124	(D or E)224	(D or E)324	(D or E)424
2025	(D or E)125	(D or E)225	(D or E)325	(D or E)425

## Step 2: Locate Hydromassage Rotary Jets (6 Fin Jets)

Locate your spa model in the images below. Your spa model can be identified by using the **model designator** identifiers of your serial number (See Figure 2 above). The affected **Hydromassage Rotary Jets** (6-fin rotary jets) are highlighted with a red circle. Once the jet locations are identified, proceed to the next step.

GRANDEE (GGN)

ENVOY (KKN)

VANGUARD (VVN)

ARIA (ARN)

SOVEREIGN (IIN)

PRODIGY (HN)

JETSETTER LX (JTN)

JETSETTER (JJN)

### Step 3: Turn Off Hydromassage Rotary Jet (6 Fin Rotating Jet)

Turn off the jets using the control panel, then rotate the jet clockwise until it reaches a hard stop. Next, turn the jets back on from the control panel and check for any reduction in water flow. Please note that some jets may continue to emit a slight trickle of water even when turned off; this is due to system pressure and does not indicate a malfunction. The **SoothingStream® Jet** (9-fin rotating jet) can be used as desired.

Twist clockwise to turn off jet

Use as desired
